

MAVIR successfully accessed the MARI platform

Date: 06/10/2026

The electricity Transmission System Operators (TSOs) of the Manually Activated Reserves Initiative (MARI) platform are pleased to announce that MAVIR, the Hungarian TSO, successfully accessed the MARI platform on October 5th 2026.

Thereby, the Hungarian national market is connected to the MARI platform in accordance with the EB Regulation, allowing now the exchange of mFRR balancing energy with all the countries already connected.

Further planned accessions and other MARI relevant information are published in the [MARI accession roadmap](#).

About MARI

MARI is the European implementation project for the creation of the European mFRR platform. The MARI project includes 29 TSO members and 3 TSO observers. The project established, develops, and operates the European platform for the exchange of balancing energy from frequency restoration reserves with manual activation or mFRR-Platform, pursuant to Article 20 of the Commission Regulation (EU) 2017/2195 of 23 November 2017 establishing a guideline on electricity balancing (EB Regulation).
