# ESC Expert Group on EV/EVSE & Heat Pump Certification

- Following formal agreement to create the expert group, it has met 3 times since the September ESC.
- The first meeting covered
  - the intent,
  - the scope,
  - the terms of reference,
  - administrative arrangements,
  - workstreams.
- The second and third meetings focussed on presentations from experts covering the following topics:
  - EV & EVSE standards
  - EV Homologation
  - Heat pump standards and CE marking
  - Compliance schemes

# Expert Group on Certification

- The third meeting also reviewed the terms of reference, with a view to finalizing them for the March 2025 ESC.
- The creation of the workstreams and their co-chairs was discussed.
  - EV/EVSE to be chaired by Julian Treichel with Ingo Diefenbach and Miguel Martinez as co-chairs (both representing CENELEC),
  - Heat pumps to be chaired by Tarik Bellahcene and Laure Meljac (Tarik is EHPA secretariat and Laure is EHPA expert).
- It is suggested that future expert group meetings are held over 3 hours in the last week of each month starting in January 2025.
- Workstreams will set their own work plan, but will develop terms of reference for the expert group to approve.

# Overview of workstreams' tasks
