2. Technical glossary:

Capitalised Term	Definition
Affected Party/Parties	NEMO(s) and/or TSO(s) which is/are affected by the reported issue(s);
Allocation	Attribution of the Cross Zonal Capacity;
Allocation Constraints	The constraints to be respected during capacity allocation to maintain the transmission system within operational security limits and have not been translated into Cross-Zonal Capacity or that are needed to increase the efficiency of capacity allocation;
Allocation Information	Data exchanged as part of the Allocation process;
Backup (BUP) procedure	Procedure that describes the backup actions and workarounds that are available in order to overcome any issue without (significant) risk for breaching the applicable deadline;
Balance Responsible Party	The role that is responsible that the supply of energy corresponds to the anticipated consumption of energy in its balance area during a given time period and financially regulates for any imbalance that arises;
Bug fix	A solution for an issue where maintenance is needed;

Capitalised Term	Definition
Business Day	A measurement of time that refers to any day in which normal business is conducted. This is generally considered to be Monday through Friday and excludes weekends;
Capacity Calculation Calculator	The entity with the task of calculating Cross-Zonal Capacity, at regional level or above and of managing the validation process of the capacity calculation;
Capacity Calculation Region	The geographic area in which coordinated capacity calculation is applied;
Capacity Management Module (CMM)	A system containing up-to-date information on available Cross-Zonal Capacity for the purpose of allocating intra-day Cross-Zonal Capacity;
Central Change Administrator (CCA)	<p>The role in charge to coordinate the Change Control Procedure.</p> <p>The detailed description of the role is provided in section 1.3.2 of the Exhibit 3 to the IDOA: Change Control Procedure;</p>
Central European Time (CET)	<p>Standard time which is 1 hour ahead of the Coordinated Universal Time (UTC+01:00).</p> <p>All countries in the CET time zone observe DST (UTC+2) from 02:00 am on the last Sunday of March until 03:00 am on the last Sunday of October;</p>
Change	An alteration, small or large, through which a Component becomes different;

Capitalised Term	Definition
Clearing Price	The price determined by matching the highest accepted selling order and the lowest accepted buying order in the electricity market;
Clearing System	the CCP's IT system used to perform the task of clearing and settlement of all matched orders where the CCP acts as counter party to market participants;
[REDACTED]	[REDACTED]
Common Grid Model	A Union-wide data set agreed between various TSOs describing the main characteristic of the power system (generation, loads and grid topology) and rules for changing these characteristics during the capacity calculation process;
Component	A piece of software, hardware, reference data, the SIDC Algorithm, Procedures or document (e.g. functional documentation) as listed in Annex 1 of the Exhibit 3 to the IDOA: Change Control Procedure.;
Contingency	The identified and possible or already occurred fault of an element, including not only the transmission system elements, but also significant grid users and distribution network elements if relevant for the transmission system operational security;

Explicit Market Participant	The entity or entities making use of the mechanism to allocate capacity through Explicit Allocation;
External commercial trade schedule	A schedule representing the commercial exchange of electricity between market participants in different scheduling areas;
External Communication	Email communication flow from the NEMOs and/or TSOs to Market Participants;
Fallback procedure	Procedure that is triggered when a deadline: <ul style="list-style-type: none"> - CZC and allocation constraints submission deadline - Allocation deadline - XB nomination deadline - Publication of results is (very likely to be) breached;

Capitalised Term	Definition
Firmness	A guarantee that Cross-Zonal Capacity rights will remain unchanged and that a compensation is paid if they are nevertheless changed;
Flow	The allocated capacity per direction and per Scheduling Area Border to each ID trade and import/export shipper pair according to local shipping business rules;
Flow-Based Approach	A capacity calculation method in which energy exchanges between Bidding Zones are limited with power transfer distribution factors and available margins on critical network elements;
High-Level (Functional) Architecture	Description of the system landscape, including the interfaces and data flows related to the Single Intraday Coupling and the associated processes;
Hot Fix	A solution for an issue where no maintenance window is needed;
Hourly Order	A product for continuous intraday coupling for constant energy delivery and for a period not exceeding one hour;
Hub Nomination	A schedule representing the commercial exchange of electricity within a scheduling area (=Delivery Area) between different market participants;
Implementation Manager	The person identified in the Implementation Plan as responsible for the implementation of the Change. The detailed description of the role is provided in section

Capitalised Term	Definition
Interconnector	Transmission line which crosses or spans a border between countries and which connects the national transmission systems of the countries;
Internal commercial trade schedule	A schedule representing the commercial exchange of electricity within a scheduling area between different market participants;
Internal Communication	Email communication flow between the NEMOs and TSOs;
Intraday Cross-Zonal Gate Closure Time	The point in time where Cross-Zonal Capacity allocation is no longer permitted for a given market time unit, as defined in article 2, 39° CACM;
Intraday Cross-Zonal Gate Opening Time	The point in time when Cross-Zonal Capacity between Bidding Zones is released for a given market time unit and a given Bidding Zone border, as defined in article 2, 38° CACM;
Intraday Market	Market timeframe between Intraday Cross Zonal Gate Opening Time and Intraday Cross Zonal Gate Closure, where commercial transactions are executed prior to the delivery of traded products;
Intraday Market Timeframe	The timeframe of the electricity market after intraday cross-zonal gate opening time and before intraday cross-zonal gate closure time, where for each market time unit, products are traded prior to the delivery of the traded products, as defined in article 2, 37° CACM;
Issue	The cause, or assumed cause, of an Incident;

Capitalised Term	Definition
Last Hour Flow (LHF)	Traded capacity of the Last Hour of the previous day, necessary due to any ramping restrictions and optimizing volume coupling calculation;
[REDACTED]	[REDACTED]
Local	A level that is not common to all Parties of the Single Intraday Coupling;
Local Change Administrator (LCA)	The person appointed by each Party as single point of contact for that Party, being involved for the purpose of the Change Control Procedure. The detailed description of the role is provided in section 2.3 of the Exhibit 3 to the IDOA: Change Control Procedure;
Local Tools	The IT Systems of individual Parties;
LTP/hub	This is the functional entity of a PX operating in a specific scheduling area;
Maintenance Window	A period of time designated in advance, during which preventive maintenance that could cause disruption of service may be performed;
Market Congestion	A situation in which the economic surplus for single day-ahead or intraday coupling has been limited by Cross-Zonal Capacity or allocation constraints;
Market Coupling Operator (MCO) Function	The task of matching orders from the day-ahead and intraday markets for different Bidding Zones and simultaneously allocating Cross-Zonal Capacities, as defined in article 2, 30° CACM;
Market Coupling (MC)	Implicit auction process to allocate the transmission capacities in a defined region;

Capitalised Term	Definition
Market Participant (MP)	Entity authorized by a NEMO to submit Orders.
Market Time	Central European summer time or central European time, whichever is in effect;
Matched Orders	All matched, buy and sell, orders by the price coupling algorithm or the continuous trade matching algorithm;
Matching	The trading mode through which sell orders are assigned to appropriate buy orders to ensure the maximisation of economic surplus for single day-ahead or intraday coupling;
Matching results	All matched, buy and sell, orders within a trade made by the price coupling algorithm or the continuous trade matching algorithm;
Micro releases	A new release of the software with multiple hotfixes that can be installed through a maintenance planned on short notice and with a reduced number of testing phases XXXXXXXXXX
Necessary Party/Parties	Party/Parties whose presence and active cooperation is required during the IC in order to find the solution to the issue(s). This can be a NEMO or TSO or service provider;
NEMO Modification	A request for complex Changes (only affecting the SOB and the NEMOs), with a medium/high Risk category, affecting multiple NEMO Components, or Components which are under the responsibility of more than one NEMO but with no impact to the TSOs;
Net Position (NP)	The netted sum of electricity exports and imports for each market time unit for a Bidding Zone;

Capitalised Term	Definition
Nominated Electricity Market Operator (NEMO)	An entity designated by the competent authority to perform tasks, as defined in CACM, related to single day-ahead or Single Intraday Coupling;
Nomination	The notification of schedules to related TSOs;
Nominating Parties	The entities that perform the Nomination process;
Nomination On Behalf	Nomination on behalf means the creation of (parts of) a Schedule by a TSO or another entity, instead of a Nomination by the respective Scheduling Agent;
Non-Standard Intraday Product	A product for continuous intraday coupling not for constant energy delivery or for a period exceeding one market time unit with specific characteristics designed to reflect system operation practices or market needs, for example orders covering multiple market time units or products reflecting production unit startup costs;
Normal (NOR) procedure	Procedure that describes the normal processes and the normal timeline of the Single Intraday Coupling;
NTC Method	The capacity calculation method based on the principle of assessing and defining ex ante a maximum energy exchange between adjacent Bidding Zones;
Operational Security Limits	The acceptable operating boundaries for secure grid operation such as thermal limits, voltage limits, short-circuit current limits, frequency and dynamic stability limits;
[Redacted]	[Redacted]

Capitalised Term	Definition
Order	An intention to purchase or sell energy or capacity expressed by a market participant subject to specified execution conditions;
Originator	One or more NEMO(s) and/or TSO(s) submitting a Request for Change;
Other (OTH) procedure	Procedures that deal mostly with organization and communication aspects;
Physical Congestion	Any network situation where forecasted or realised power flows violate the thermal limits of the elements of the grid and voltage stability or the angle stability limits of the power system;
Post-Coupling Processes	Processes that follow after the calculation and validation of the Market Coupling Results, mainly related to the Scheduled Exchanges and the Congestion Income;
Pre-Coupling	Processes prior to the calculation of the Market Coupling Results, related to the CZCs and Allocation Constraints;
Price Clearing	The price determined by matching the highest accepted selling order and the lowest accepted buying order in the electricity market;
Ramping Constraints	Term used for the maximum change of the power flow on an Interconnector between two consecutive hours;
Reliability Margin	The reduction of Cross-Zonal Capacity to cover the uncertainties within capacity calculation;
Remedial Action	any measure applied by a TSO/NEMO and/or several TSOs/NEMOs, manually or automatically, in order to

Capitalised Term	Definition
	maintain operational security and/or the Single Intraday Coupling;
REMIT UMM	Urgent Market Messaging (UMM) that have been developed to comply with the Regulation on Wholesale Energy Market Integrity and Transparency (REMIT);
Request for Change (or RfC)	A formal request by an Originator for any modification to a Component or to its usage;
Risk	The potential that a Change will lead to a situation involving exposure to danger or to an undesirable outcome;
Risk Case	A specific deviation from the normal process, the handling of which is explicitly covered in the Normal and Backup procedures;
Scenario	The forecasted status of the power system for a given timeframe;
Schedule	A reference set of values representing the generation, consumption or exchange of electricity for a given time period;
Scheduled Exchange	An electricity transfer scheduled between geographic areas, for each market time unit and for a given direction;
Scheduled Exchange Calculator	The entity or entities with the task of calculating scheduled exchanges;
Scheduled Exchange Verification	For a B2B physical clearing, Explicit and Implicit Allocation Results between the 2 involved Scheduling Areas have to be known by the TSO post-coupling systems. With this information TSOs check bilaterally

Capitalised Term	Definition
Structural Congestion	Congestion in the transmission system that can be unambiguously defined, is predictable, is geographically stable over time and is frequently reoccurring under normal power system conditions;
Ticket System	System for registering issues in the Single Intraday Coupling;
Trade	One or more matched orders, as defined in article 2, 25° CACM;
TSOs Post-Coupling Module	The TSO's IT system used to perform the task of receiving schedules from Scheduling Agents, creating schedules on behalf of Scheduling Agents and verification of these schedules;
TSOs Pre-Coupling Systems	The TSO's IT system used to perform the task of sending cross zonal capacities and allocation constraints to the CMM;
XBID Incident Log	Depository in which incidents related to the Single Intraday Coupling are registered;
XBID Member	A TSO or NEMO connected to the XBID System;
XBID Procedures	The operational procedures that are executed as part of the Single Intraday Coupling;
XBID System	The central IT system with which the Single Intraday coupling is run.
