

Update on NEMO Committee activities

11/03/2020

20th MESC meeting

CONTENTS

1. Preparation of Annual Report
2. Preparation of Cost Report
3. Upcoming public consultation
4. Decoupling

1. Preparation of Annual Report

- NEMOs, in cooperation with TSOs, are preparing the Annual Report with 2019 data.
 - For the past, the period 2017 – 2019 is analysed.
 - For the future, the period 2020 – 2022 is considered.
- Single report covering all reporting requirements and details specified in the new Algorithm Methodology. Chapters:
 - Operations: incidents and RfCs implemented
 - Algorithm performance monitoring
 - Scalability and RfC roadmap
 - R&D
- Publication on 1st July 2020 followed by a public workshop.

2. Preparation of Cost Report

- NEMOs and TSOs, are preparing the 2019 Cost Report pursuant to Art. 80 of CACM.
- Improvements suggested by NRAs will be considered.
- Publication expected in June.

3. Upcoming public consultation

- SDAC products.
 - Regular review pursuant to CACM Art. 40.
 - Introduction of one additional product: the Scalable Complex Order
 - Online consultation expected during April in the NEMO Committee website.

4. Decoupling

- In case of decoupling, **timely and consistent spreading of information** published by NEMOs is fundamental to address the market in an effective way.
- Based on the experience of the last years of market coupling, **NEMOs are working to identify a minimum set of information** that each NEMO could include in its own communications to its MPs, while retaining full freedom to manage individual communication policy and channels with them.
- In particular NEMOs are working on the following few principles.
 - Same **minimum timing for publication**, in line with existing operational procedures
 - Same **minimum content for information**, based on inputs provided by and agreed upon in the OPSCOM.
- What before could be ideally **extended to integrate TSO info**.
- This is without prejudice to eventual further in depth analysis of the events, to be delivered in a longer timeframe.
