

Safeguards needed for the implementation of 15 min MTU in the Single Day-Ahead Coupling

MESC, 9 March 2023

15 min MTU in SDAC : Eurelectric prisma

Safeguards needed for the SDAC 15 min MTU go-live

These preconditions are not met for the moment.

In the absence of these safeguards, the SDAC 15 min MTU go-live is risky and might be detrimental to the proper functioning of the DA market.
