

- In the context of the recent changes to the second auction mechanisms in Europe, ACER and NRAs have decided to assess the benefits and inconvenients of those auctions.
- A survey has therefore been created in which market participants are invited to provide their views.
- Some questions of the survey (section 4) are to be filled-in by individual market participants, as they concern bidding strategy and NEMO competition. The answer to those questions will be kept strictly within ACER and NRAs.
- ACER and NRAs invite market participants to fill-in [the survey](#) by **16 March 2023**.
