# FCR market implementations for delivery day 1 July 2020

Date: 09/03/2020

Announcement: FCR market implementations for delivery day 1 July 2020

Dear Market Parties,

The TSOs of the FCR Cooperation are on a continuous basis working on the evolution of the process for contracting FCR capacity. In this context, changes in market design are planned which will take effect from delivery day 1<sup>st</sup> July onwards.

From that day on the implemented procurement process will be as follows:

- Product time slice length will be shortened to six four hour time slices per day, each with individual prices.
- According to the following table, FCR TSOs will close daily auctions in D-1 at 8:00. The planned changes will include a shift from week daily to calendar daily auctions.

GCT D-1 08:00	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
Delivery Day (D)	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday	Monday

As already existing, bids have to be made in Euro per MW per product time slice and remuneration will be based on a marginal price scheme.

The Implementation Guide will be sent out to BSPs in the first weeks of March 2020.

Best regards,  
 The FCR Cooperation
