

## Red Eléctrica successfully accessed the MARI platform

**Date: 17/12/2024**

The electricity Transmission System Operators (TSOs) of the Manually Activated Reserves Initiative (MARI) platform are pleased to announce that Red Eléctrica, the Spanish TSO, successfully accessed the MARI platform on December 10<sup>th</sup> 2024.

Thereby, the Spanish national market is connected to the MARI platform in accordance with the EB Regulation, allowing now interchanges of balancing energy from mFRR between Austria, the Czech Republic, Germany, Slovakia, Portugal and Spain.

Further planned accessions in 2025 and other MARI relevant information are published in the [MARI accession roadmap](#).

---

### About MARI

MARI is the European implementation project for the creation of the European mFRR platform. The MARI project includes 29 TSO members and 3 TSO observers. The project established, develops, and operates the European platform for the exchange of balancing energy from frequency restoration reserves with manual activation or mFRR-Platform, pursuant to Article 20 of the Commission Regulation (EU) 2017/2195 of 23 November 2017 establishing a guideline on electricity balancing (EB Regulation).
